The use of Collaboration technology to drive down costs and improve productivity is fast gaining popularity amongst enterprises of all sizes, with over 40% of the enterprises surveyed targeting its use for this purpose.

However, enterprise customers remain ill served by the current offerings in the market, that are either too highly priced or deliver poor performance. To address this concern Mithi has developed a highly reliable, real-time collaboration software-Connect Xf, that comes at a very affordable cost.

Adaptable Collaboration Solution to meet your Special Needs

The software comes with numerous configuration options, APIs, an Open Architecture, and customized deployment and development services to enable easy adoption.

Choice of solutions

Choice of In-premise, Cloud & Hybrid solutions, Distributed and Centralized set-ups to match your infrastructure & organizational structure.

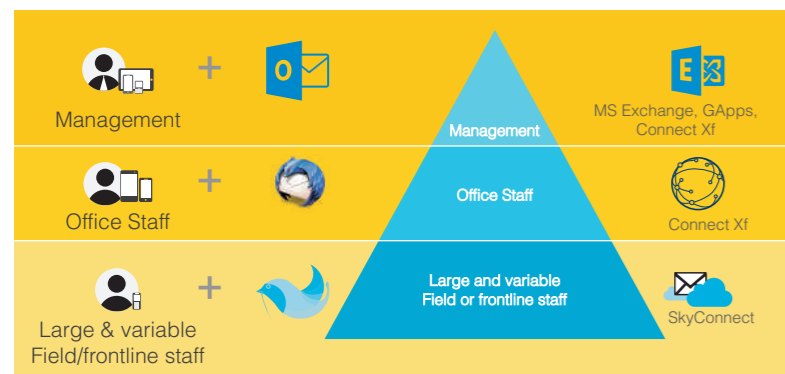

Co-existence with other mailing systems

Connect with other mailing systems to enable easy extension or gradual transition from legacy set-ups.

Integration with existing systems

Connect with other Directory servers, Archival, Backup, Security, DR and Availability Solutions etc. to help integrate with the existing IT environment.

Enterprise Applications Integration

Easy integration with other applications such as CRM, ERP, CMS, Issue Trackers, Ticketing System etc. to help you enhance your collaboration environment.

- Single sign on
- Send and receive email alerts on events
- Schedule tasks & reminders
- Import/Export contacts
- Trigger events/Log tasks in the collaboration Applications via Email
- and more...

Realtime Collaboration Environment to Supercharge your Business

The secure realtime collaboration environment provided by the software helps -

- De-clutter your Mail box
- Achieve faster issue resolution
- Lower communication costs
- Reduce travel & face to face meetings
- Improve customer engagement

Top 3 priorities for key business drivers for IT

- Enhanced customer experience
- Innovation to drive competitive advantage
- Internal Process efficiency and agility

“ Using Secure Enterprise Chat in Connect Xf the issue resolution time and communication costs got reduced between employees and associates for Taurus. ”

Mr. Chaitanya Kaikini,
IT Manager, TAURUS MUTUAL FUND

Live collaboration

- One-to-One and Group Chat, accessible from desktop, web clients
- Audio-video chat accessible from web browsers on desktop devices
- Free Audio/video calls with zero infrastructure investments
- Searchable chat History
- Automatic archival of chat transcripts
- Security and Control using policies
- Activity Reports
- Roster Management using the corporate directory server
- Open Data standards & protocols & API interface to enable easy integration of your business applications with Connect Xf's Collaboration features

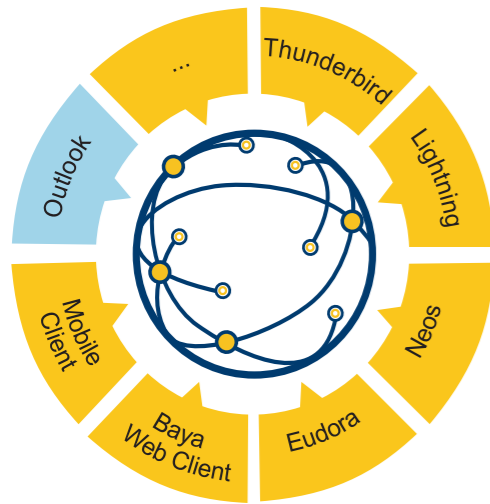

“ Mithi Connect Xf collaboration platform constitutes a key component of FIINFRA's Infrastructure offering to IFAs and Distributors. Connect Xf has enabled seamless and highly secured collaboration across all channels and devices covering mobile, tablet and desktops between our key users - service team, IFA/partners and clients. It has been a perfect fit for our enterprise wide collaboration. Mithi has provided a new benchmark with its open source offerings and integration capabilities. ”

- Harbinder Saini
Chief Technology Officer, Ffreedom Financial Planners

More Capabilities at Lower Cost

Built on some of the most well tested and secure Open source Components in the world, it provides an affordable & adaptable alternative to the often more expensive and in-flexible proprietary systems.

Its open architecture allows for easy integration with a wide range of free to use apps, low cost devices and systems.

Open to Connect

- More choice of applications & free to use software
- More devices to choose from for mobile access
- Free Audio-Video calling
- Zero additional licensing fee for proprietary connectors
- Easy and cost effective scalability
- Enterprise grade security for mail flow and access control
- Access applications over a browser or by use of free apps on the desktops and devices.

Secure and Productive Collaboration Environment

The software also incorporates features for enterprise security, access control, information flow management and archival, to enable you to create a secure and productive collaboration environment.

Authorization & Policy

- Mail policies to structure and define the flow of information in the organization
- Automatic Forwarding of mail to chosen accounts and folders based on certain policies/rules to ensure efficient information flow & organization
- Watch Dog Archival of email to keep a track of all information that moves within and goes in and out of the organization
- Searchable mail, chat and document archival for knowledge management & future reference
- Authorization control to manage the availability of applications to different users
- Access control to restrict users from using the services from un-trusted networks
- Single Sign-on webclient for all the collaboration applications
- Distribution lists or mailing groups
- Persistent Multi-User Chat Rooms

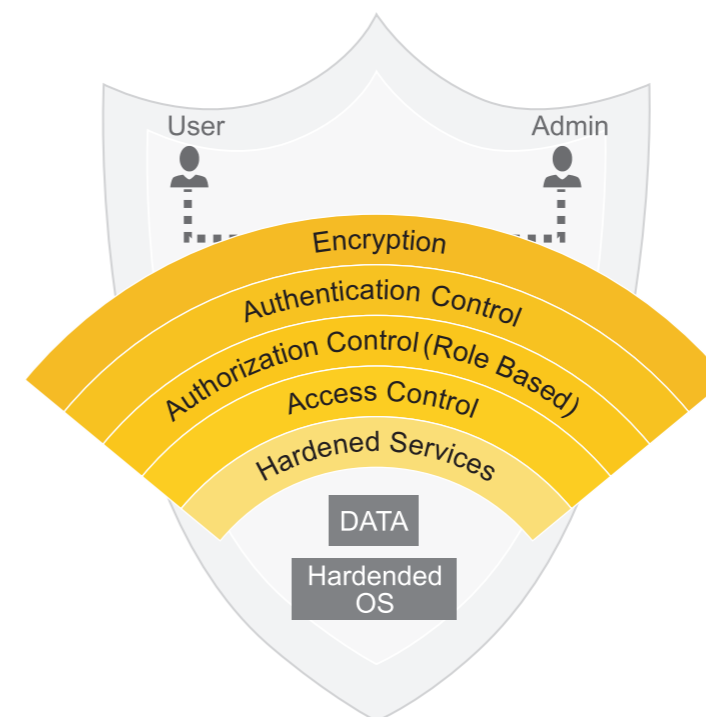

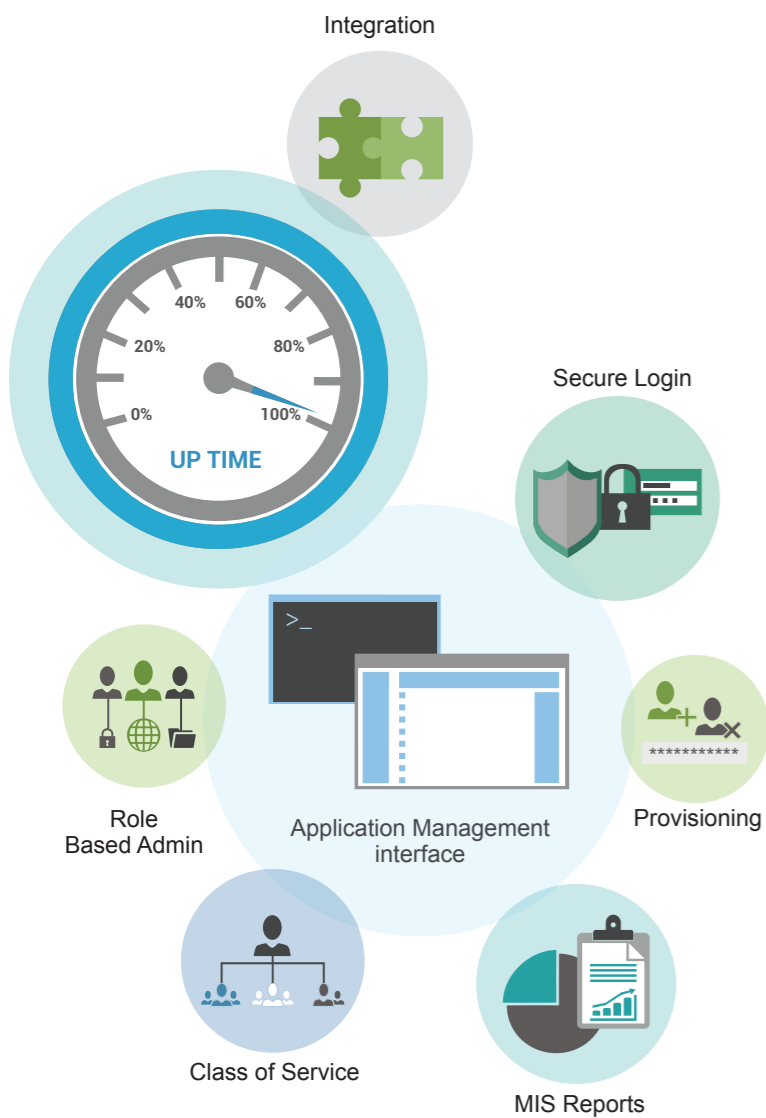

Applications Features

- Zero Maintenance Webclient for email, chat, calendar, contacts & video calling
- Compatibility with Popular Desktop & Mobile Client
- SISA (Single Instance Storage for Attachments)
- Email Archival, Chat Archival
- Automated archival of chat transcripts
- Fuzzy Search & Filters
- SMS alerts for important Email
- Personal Folders
- Shared Address Books
- Import/Export Calendar data
- Import/export of Contacts: allowing you to keep your address books on different devices and apps up-to-date
- Shared Calendar
- Tasks, events and meeting scheduler
- Presence Management
- Persistent Multi-User Chat
- Audio-Video Calling
- One platform for all collaboration apps
- Customizable web client

Multi Layered Security

- Authorization & Access Control
- Password policies
- Firewall
- Anti Virus
- Spam Detection, Control & Management
- Mail Policy
- Encryption
- Activity Report
- Secure Mail Relay (SMTP)
- Email and Chat Archival
- Role based administration
- Detecting & Neutralising DOS attacks
- Audit trails

Reliability

- Automatic Backup
- Personal Archival for mail retrieval
- Mail Parking
- High Availability with Load Balancing
- Continuity Solution with Disaster Recovery
- Email & SMS alerts on server events

Scalability & Performance

- Enhanced mail flow control
- Easy & Cost Effective Scalability
- SISA (Single instance attachment storage)

Adaptability

- Standard Data Formats, Open Protocols and APIs to integrate with other applications & systems
- Secure Single Sign On connector for integration with other business applications

Manageability

- Unified Management Console
- Role Based Administration
- Class-of-Services
- Automated Health monitor
- App Manager for end users
- Command Line Interface
- Granular Control
- Manage Multiple Domains
- Activity Reports
- Mail Traffic Reports
- Server Statistic Reports

Life Cycle Services

- Consulting & Design Services
- Implementation Services
- Customer Education Services
- Maintenance Services
- Infrastructure Renewal Services
- Customization & Integration Services

In-premise Email & Collaboration Solution

Gateway | Centralized | Distributed

Collaboration Applications

- Secure business-class Email with faster delivery
- Real-time collaboration with Chat
- Video Chat
- Shared Calendar & Contacts
- Compliance and Personal Archival
- Access from desktop clients, web client and Mobile devices

Management Features

- Provision domains, users, groups using the Web-based Administrator Console
- MIS reports for user activities, mail traffic and Server health
- Inbuilt backup tool for the system and configuration data
- Distributed & Centralized setup

System Performance

- High availability with redundancy at all levels
- Optional Mail parking service ensures that mails are not bounced if the mail server is inaccessible
- Optional DR Site for full redundancy of Primary site
- Distributed site servers to optimize local mail flow and optimize local bandwidth

Integration Features

- Integration with External Directories
- Integration with proprietary Email Solutions
- Web services interface for integration with in house business applications like HRMS, ERP, CRM etc.
- Custom Deployment and Integration Services
- Cost Effective Management Services

Case Study

Mithi implemented a uniform email solution for the whole group and helped achieve huge savings on TCO, near-zero service downtime and easier scalability. Currently, over 30,000 users from ABG are using Connect Xf Email Servers across 35 locations.

Testimonial

"Mithi Connect Xf messaging solution implemented at our location has been running successfully, and is currently handling a load of 30,000 email users across Aditya Birla Group of Companies distributed at different locations in India...What distinguishes Mithi clearly from other open source based solution providers is its clear vision, product oriented approach and relentless drive to leverage the open source platform to reduce the TCO for the customers."

- Mr. Prasad Badiwale,
Vice President - IT,
ADITYA BIRLA MANAGEMENT
CORPORATION LTD (ABMCL)

"Mithi has provided...a reliable platform which offers...an end-to-end solution for messaging needs, and has addressed all our security requirements. Connect Xf is perfect for an enterprise that is cost conscious and also needs high performance..."

Mr. Bhavesh Patel,
Vice President - IT, MOTIF INC

Cloud based Email & Collaboration Solution

Shared | Dedicated | Private Cloud

Collaboration Applications

-  Secure, business-class Email with faster delivery
-  Real-time collaboration with Secure Enterprise Chat
-  Video Chat
-  Access from desktop clients, web client and Mobile devices

Management Features

-  Administrator Web console available for provisioning domains, users, groups
-  MIS reports for user activities, mail traffic and SPAM

System Features

-  In premise mail gateway server to optimize local mail traffic and reduce bandwidth load
-  Mail parking in case of mail gateway or link failure
-  Optional Full DR site for 100% redundancy
-  Compliance and Personal Archival on Cloud
-  99% availability
-  Flexible storage solutions
-  Auto Scanning - Anti Spam - Anti Virus

24/7 Monitoring, Maintenance and Support

-  Round-the-clock server management and maintenance
-  Daily backups of complete system and mail store
-  L1, L2 and L3 support from trained and qualified staff

Hosting Partner and infrastructure

- Choose your hosting partners.
- Choose between Dedicated, Shared and Co-located infrastructure
- Custom Deployment and Integration Services

Case Study

Mithi provided a hybrid solution combining the hosted email services from Mithi with an on-premise deployment of Connect Xf configured to tunnel mail between the sites providing fast mail delivery both ways. The cloud setup acts as a fall back in case of a Primary site/network failure. Users can access the email and chat applications via desktop, web and mobile clients increasing their productivity.

Testimonial

"As our IT team strength was very low, so we had to choose a solution which is very easy and manageable. And also we were looking on minimizing the IT Budget for Email Solution. Mithi fitted our requirement perfectly."

Mr. Chaitanya Kaikini,
IT Manager, TAURUS MUTUAL FUND
